

eBay – NetSuite Integration App overview

Balasubramanian Mahadevan

Updated 1 year ago

The eBay – NetSuite Integration App helps retailers combine the selling power of eBay with the proven back-office features of NetSuite. With the eBay integration app, sellers can focus on increasing sales and manage orders without needing to manually sync their eBay and NetSuite accounts.

Note: To view a list of eBay marketplaces that are supported by the Integration App, refer to the [API Reference \(SiteCodeType\)](#) section of the eBay developer site.

With the eBay - NetSuite integration app, you receive our expertise in NetSuite, eBay, and cloud integrations. Using this integration app, you can quickly and easily integrate order, product, and customer information between eBay and NetSuite without requiring additional development or IT support.

Note: The integration app is available in the US, AU, and EU marketplaces.

Prebuilt functionality

The eBay - NetSuite integration app comes with prebuilt integration flows that synchronize your Customers, Sales Orders, Fulfillments, Inventory levels, Pricing, and Items between NetSuite and eBay, eliminating the overhead associated with dual-entry and maintenance between multiple systems.

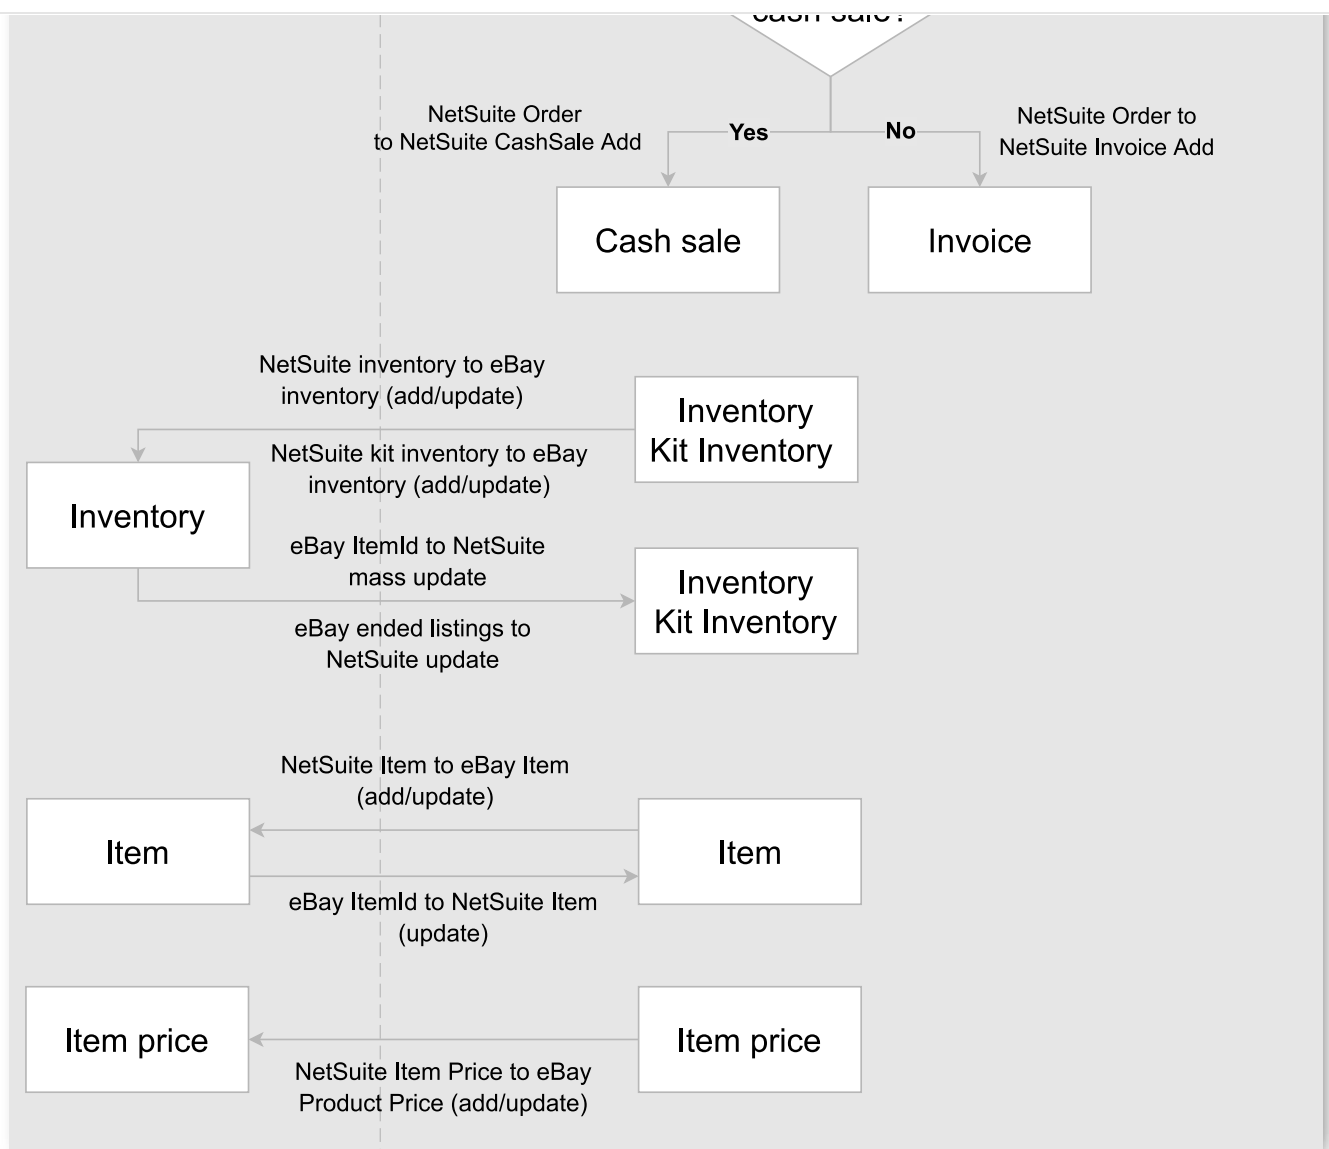

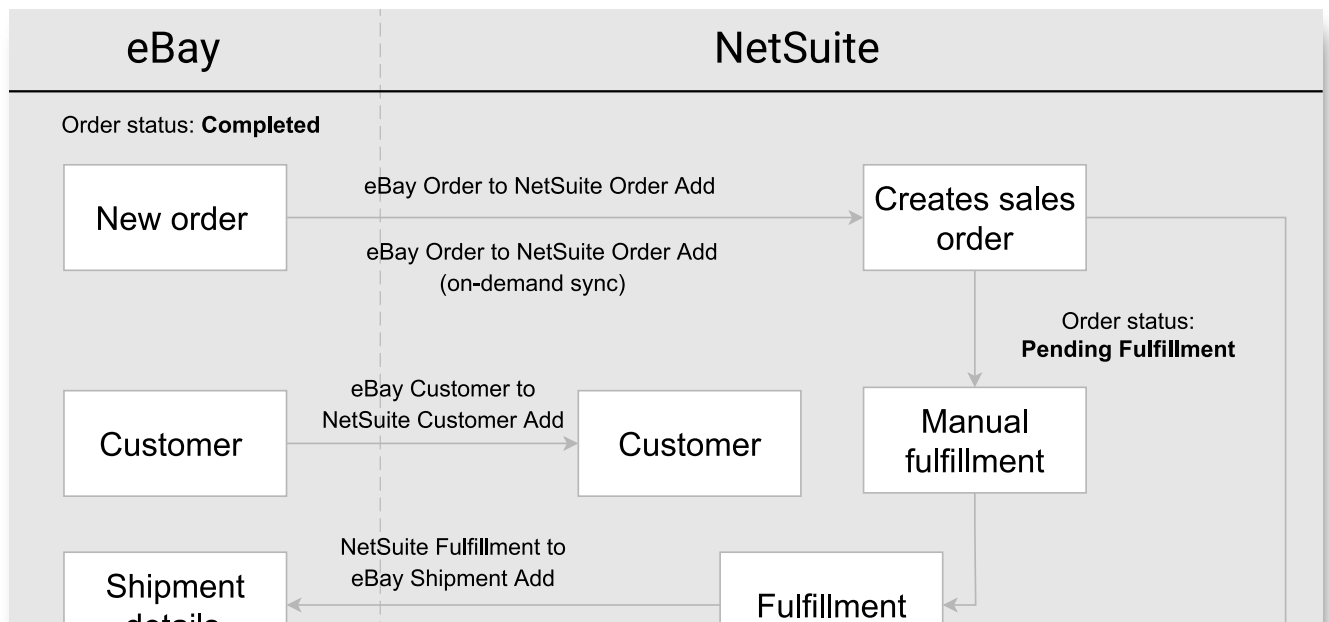

Integration flows

At a high level, the integration app consists of the following key integration flows:

- Import Customers from eBay to NetSuite
- Import Sales Orders from eBay to NetSuite
- Export Fulfillments from NetSuite to eBay
- Export Inventory Levels & Pricing from NetSuite to eBay
- Export Products, Variations from NetSuite to eBay

Workflow diagram

Following is a workflow diagram that explains the flow of information between eBay and Netsuite:
